Accessing the Radioisotope Management Module

After you log into Lumen, you will see your lab homepage. Before you are able to access the Radioisotope Managment Module, you must complete the Radioactive Materials Radiation Worker Certification in myHR Learn.

To access the Radioisotope Module, select "Rad Summary".

Lab Radioisotope Management Module Summary Page

On the Rad Summary Page, you will see a summary for your entire lab, including:

Completing a Radioisotope Order Request

1. From the Rad Summary page, select "Rad Request".

- 2. Enter the following information about your order request:
 - a. Company (vendor) from which you would like to order
 - b. Information for the item(s) you are requesting including product code, compound, active isotope, activity requested (in mCi) and quantity (# of vials).
 - c. For Research Safety package delivery to your lab, enter Building and Room Number in "Special Instructions" field.

3. This page also displays a "Laboratory Isotope Summary", which shows the isotopes you are permitted to order and their limits. When you finish entering data for your request, select Submit.

| Carbon 14 | 1000 mCi | 0.468112 mCi | 0 mCi | 999.532 mCi |

4. Once you have submitted the order request, an email is sent to Research Safety staff to inform them of your request. You will see a message at the top of the screen to confirm that a "Rad Acquisition" has been created and a RAN (Rad Acquisition Number) has been assigned to your request.

Note: Your order must still be entered into NU Financials; follow your Department's ordering process.

5. When you return to the Rad Summary page, you will see your current isotope inventory as well as a list of Pending Orders. Your new order request will be listed here until it is received.

Waste Pickup Request

You can access the waste pickup request page two different ways:

- Select "Rad Waste Pickup" in the left menu, or
- Select "Waste Pickup Request" from the Rad Summary page

Complete the "Containers to Pickup" fields, including the isotope and the type of waste container (include activity in mCi or uCi and volume, see Examples). Also indicate if you have any vials to pickup.
