INSTITUTIONAL BIOSAFETY COMMITTEE REVIEW

10. Review of proposed facilities and practices:

The Chair provided an overview of the arrangement for the facilities and practices.

Points of Discussion:

1. The Committee recommended that Biosafety SOP Section 5.6 be revised to include priming steps prior to injection of superficial lesions.
2. The Committee recommended that current Biological Safety Cabinet (BSC) and Compounding Aseptic Containment Isolator (CACI) certification reports be submitted to IBC Services when available.
3. The Committee noted that the [REDACTED] indicates that prefilled disposable eyewash bottles are only available in two of the twelve dosing rooms. The Biosafety Officer confirmed that prefilled disposable eyewash bottles are brought into each dosing room during subject dosing.
4. The Committee discussed the Prior Meeting Minutes and the recommendation that site-specific documents be revised to remove references to PAPRs, as they are unnecessary for handling spills of this study agent. The Committee noted that PAPRs are listed as being available on [REDACTED] for a nebulizer-administered study agent and determined this to be acceptable.
5. The Committee noted that the Biohazard Signs for the RP1 and RP2 study agents could be consolidated into a single sign but determined that the final decision should remain at the discretion of the Institution.

11. Site requirements:

The Chair reviewed training and communication requirements for maintaining IBC approval with the Biosafety Officer and Institutional Representatives.
